

POLICY Consultation

FARA

We're committed to protecting the health and safety of all its workers. Injury and illness are needless, costly, and preventable.

We'll consult with workers regarding implementing practices and systems to ensure their health and safety. Worker involvement at all levels is essential for ensuring a healthy and safe workplace.

As agreed with workers, our health and safety consultation arrangements fall into the generic Agreed Arrangements category.

The primary medium for consultation is direct dialogue between management and workers. Consultation at this level is fundamental to the successful management of health and safety risks.

Consultation on health and safety issues must be meaningful and effective and will allow each worker to contribute to decisions that may affect their health and safety at work.

The consultation policy will be supported by an issues resolution procedure to ensure that all workers are given the opportunity to express their views and contribute in a timely manner to the resolution of health and safety issues that affect them. These views will be valued and taken into account by those making operational decisions.

The consultation arrangements will be monitored and reviewed as the need arises to ensure they continue to be meaningful and effective and meet the needs of the business and our team.
